Group Formation

• Get into your assigned groups (end of this document)
• Each member should spend five minutes (no talking)
    answering the following questions:
◦   What are my 2 greatest technical strengths?
◦   What are my 2 greatest technical challenges?
◦   What are my personal goals for this project?
• Discuss your answers with your group. Get to know each
    other.
Begin brainstorming with your group about ideas in prep for
the afternoon lecture.
